Calendula

LIHort.org

DAYS TO GERMINATION:

7-14 days at 70°F (21°C)

SOWING:

Direct seed (recommended) -
After last frost at a depth of 1/4".
Make 2-3 successive sowings 2-3
weeks apart for continuous
blooms from summer to heavy
frost. Transplant - Sow 4-5 weeks
before last frost.

LIGHT PREFERENCE:

Sun/Part Shade.

PLANT HEIGHT:

Varies.

PLANT SPACING:

6-12".

Parsley

LIHort.org

DAYS TO GERMINATION:

14-30 days at 65–70°F (18–21°C).

SOWING:

Transplant (recommended): Sow in 1" cell containers. Seeds take at least 3 weeks to germinate.

Direct seed:

Sow in spring after the danger of frost has passed, about 1/4- 1/2" deep, 3 seeds per inch in single rows or 2-3" wide bands 12-18" apart. Thin plants to 8-12" apart.

LIGHT PREFERENCE: Sun.

SOIL REQUIREMENTS:

Grows well in moist, fertile soil. If planted in a well-drained location, **PLANT HEIGHT:** Varies.

PLANT SPACING: 8-12".

HARDINESS ZONES: Biennial.

DAYS TO GERMINATION:

4-7 days at 75-80°F (24-27°C)

SOWING:

Transplant (recommended) - Sow into 72-cell flat, or preferred seedling container, 4-6 weeks before last frost, lightly covering seed. Harden off and transplant out after last frost. For flowering in packs, sow 8 weeks before desired bloom time. Direct seed - After last frost, sow 1/4" deep. Pinching encourages branching.

LIGHT PREFERENCE:

Sun.

PLANT HEIGHT:

Varies.

PLANT SPACING:

8-18".

HARDINESS ZONES:

Annual.
